

5/31/15

Dear George,

A few mornings ago I opened my eyes from my berth on Paradigm and for the first time I noticed the fine workmanship! Since then I've been noticing more and more.

I certainly understand how strange this may sound after all the time we spent looking her over pre-purchase, but we never looked for beauty during those visits. Now that the business of purchase is over we're coming to appreciate the Caliber design & fitting that you (and others) have obviously taken great pride in creating.

Aside from Paradigm I found talking with you a pleasure. You're special in so many ways, mainly as an outcrop of your love of the Calibers — it shows.

Many thanks,

Cory Arran
